

Planet
Earth

By: Alex Jefferson

Our planet is wild

Like the animals scuttling around
Like the wind and air blowing everywhere
Like all the people walking the earth

Our planet is green

Like my parents bed that I sleep in when it's stormy
Like the plants of the world that we care for
Like the yummy bananas first color of there life

Our planet is unique

Like my wild self for my classroom chair
Like my bedroom there is no other like it
Like every person in the unique world

Our planet is big

Like my house that I live in it is so big
Like my comfy bed that I sleep in every night
Like the oceans of the world spilling water everywhere
