

planet earth

By storm kahan

Earth changes

**Like the weather that makes us happy or sad
Like the seasons that give us snow, sun, wind, rain and
the holidays
Like our lives as we get older**

Earth is vast

**Like the oceans we sail and surf on the tides
Like the galaxy that holds the planets of our solar
system
Like the land we walk and live on**

Earth is wild

**Like the animals that frolick on this planet
Like the currents in the ocean that the moon
controls
Like the sports that are played all year**

Earth is beautiful

**Like the flowers that spread all over the world
Like the birds that fly, walk, and swim
Like the famous sights, all over the world, that can
change your life**
