

## NEARPOD

**COST:** FREE

**Product-Based/Consumptive**

**Rating:** 4+

**Web Version:** No

**Accounts:** The teacher uploads the presentation to the Nearpod website from any computer to his/her account. To share with students the teacher opens the App on his/her iPad and shares the code with the students. Students open the app and enter the code the teacher shared with them to view the presentation.

**Publishing and Sharing:** The content is hosted on the Nearpod site and can only be accessed with the code that you share with your students. It can be viewed with the app, or online.

**Teacher Use:** As a presentation and formative assessment tool

## WHY NEARPOD?

WITH  
**JUAN OROZCO**

### SUMMARY:

Nearpod allows teachers to construct presentations using the [Nearpod website](#) and deliver instruction to students by pushing content out to multiple devices at once. The teacher controls the presentation from a master iOS device, while students follow along on a class set of iPads or iPods. To enliven instruction, teachers can also embed multiple choice questions, polls, videos, quizzes, open-ended questions, and web-links in their presentations.

### ADDITIONAL SUPPORT RESOURCES:

- [Step Sheets/Handout](#): See Pages 2-5.
- [Examples](#): <http://vimeo.com/39006989>
- Complete Library of App Integration Snapshots

## Across the Curriculum

- English:** Bring in a reading passage and assess comprehension
- Math:** Demonstrate and assess place value activity
- Science:** Demonstrate and assess students on the Food Chain
- History:** Bring in a map of ancient Greece sites and compare myths
- Electives:** Demonstrate a piece of art, or even a music sheet.
